Our Product Introduction

Product Description

Large Mesh Trimming Machine 1000MM

Trim Style

Application of trimming machine

It is mainly used for trimming the periphery of wire metal mesh, with flat port and simple operation.

For example: highway or railway fence, building ground is paved with wire mesh, pet cage mesh, storage rack mesh, barbecue mesh, etc.

Features of this machine, the length of the blade is 1000MM, Barbed wire less than 1000MM can be completed at one time...

name

JX-1000Hydraulic trimming machine, large mesh trimming machine, fast trimming machine

Performance characteristics:

1. This hydraulic trimming machine is specialized in trimming the mesh with large edges. The mesh length can be 1m or more at one time. Within the allowable range, a large mesh can be repaired only four times.

2. The machine has a large mesh support adjustment frame, which makes it easier and easier to operate. It takes only 2 seconds to cut each side within 1m, which is very simple and efficient.

3. Large motor, large oil pump, fast start and strong power. You are a good helper for the ideal large order. Thickened sheet metal, specially fixed, the whole machine is very firm and stable.

4. The cutter adopts special materials for special treatment, which is very durable, the cutting products are neat, and can be

treated at a certain angle. 5. Inching start, set the position, step on the foot, and the switch works once, which is very random.
